sale so what is the arena it really about? It is a team based tactical shooter, however if your team happens to get destroyed in one match you don't necessarily get to respawn. what are your suggestions for an arena for my first game.i have a problem with the game as i do not have a mic or headset, so my personel, who also do not have a mic, and i cant get their mic to work, so i have to make them do everything. as i said this is the first game i am making. I assume you want it to be an Arena type game where you have different 4 players vs 4 players and you can choose from different maps for each game you play. I have made a quick game engine that works on the psp and it is programmed in java. It is based around a rectangular map that you have to create. it is a very simple game engine and i think it might work well for you. you can download it from my website. I assumed you wanted a team based game, and it seemed like you wanted something a bit more relaxed. What i did was to make a game that has to be played on a rectangular map. there are 6 tiles on a side and the size of the map is set by the number of players. the player 1-4 are represented by the player object and the team that wins the game will get a medal that is shown in the bottom right corner of the map. i also added the possibility to add teams with their own psp so you can play with your friends. i tried to make it very easy to use and i hope you like it. PS. i want to make more games for the psp now and i think it would be nice to be able to have your own psp games on your site. 0 ilvvie Member Jun 18, 2009 2971 posts Joined: Dec 12, 2006 Maybe you should try to create a more team based game instead of one where you are trying to score. There are many different ways to make a game. I'm not telling you to copy what I've done, just that you should try to create a game from the ground up to fit your needs and have the most fun Observant Active Member Jun 19, 2009 177 posts Joined: Apr 25, 2007 82157476af
